The "other religions" category includes followers of religions that often are not measured separately in censuses and surveys: the Baha’i faith, Jainism, Shintoism, Sikhism, Taoism, Tenrikyo, Wicca, Zoroastrianism and many other religions. Because of a lack of data on these faiths in many countries, the individual religions within this category are not projected separately. Rather, they are combined and treated as a whole. This means the growth trajectories of specific religions in this category could vary greatly.

Explore population characteristics of members of other religions using Topics & Questions or the Data Explorer.
